Skills

JavaScript, React, Redux, HTML, CSS, Ruby, Ruby on Rails, Mongoose, MongoDB, Node.js, Express.js, SQL, SQLite3, PostgreSQL, Webpack, jQuery, Git, Heroku

Projects

MatchStick   [live site](#) | [github](#)
JavaScript, React / Redux, Ruby on Rails, postgreSQL, CSS3
MatchStick is a clone of OkCupid, an online dating site. Users can create their own profiles and see other profiles.
- Built models and controllers for CRUD actions, profiles, and like associations between users and profiles
- Designed new and edit user forms to generate a new HTML5 form for every question while employing localState to store the current user's answers across pages
- Implemented backend Rails controller logic to reduce Redux state size from all profile data to user likes for the My Likes page

DAYA   [live site](#) | [github](#)
JavaScript, React / Redux, Mongoose, MongoDB, CSS3, HTML
DAYA is a social planner. Inspired by the desire to stay up to date on your friends calendars, DAYA allows for users to upload their own events and follow and comment on friends events.
- Wrote flexible React component for all event tiles on the home page and user calendars with conditional edit and delete functionality dependent on the current user
- Filtered through all users in the Redux state and only displayed profile information in the suggested follows component if no following association existed
- Ideated and executed frontend UX and UI using CSS3 flex box

Ghost Blaster   [live site](#) | [github](#)
HTML5, Canvas API, JavaScript, CSS3
Ghost Blaster is a shooting game where players try to shoot as many ghosts as possible without letting any ghosts cross the entire screen.
- Rendered different ghost images using HTML Canvas by keeping track of whether a ghost was shot or not
- Applied Vanilla JavaScript to then filter out shot ghosts 1 second after the ghost was shot so the image disappeared
- Calculated individual slope and speed for each bullet shot based on the location of the user's click event

Experience

HR Coordinator | June 2019 - December 2019
Pill Club
- Managed HRIS employee database for new hires, employee changes, and terminations. Generated and delivered People Ops Excel reports with job details for 400+ employees
- Performed group new hire orientations and restructured presentation materials from new hire feedback to better inform employees about company processes and perks

Recruiter | January 2019 - April 2019
Aerotek
- Screened 70 resumes per day and interviewed 5 qualified candidates per day for multiple job openings
- Built and maintained relationships with hiring managers to gain knowledge and generate referrals with the goal of achieving 10 sales leads per week

Education

App Academy | Fall 2020 | San Francisco, CA
Immersive software development course with focus on full stack web development

Tulane University, School of Liberal Arts | Fall 2018 | New Orleans, LA | BS of Economics, Psychology Minor
